Vitae of: Amy Gleeson Buhler MSLS
Associate University Librarian and Associate Chair of Marston Science Library

Work Experience:

Marston Science Library

George A. Smathers Libraries, University of Florida

April 2010 – Present

Title: Associate Chair

Scope of duties:

- The primary responsibility of the Associate Chair is to act in the Chair's place when absent or when otherwise required. The Associate Chair works closely with the Chair to design and deliver services and to provide collections that support research and instruction needs. The primary clientele are the agricultural, engineering, earth sciences, life sciences, physical sciences, and mathematics communities of the university. The Associate Chair is responsible for managing library operations in Access Services, Collection Services and Stack Maintenance. These duties include staff recruitment, supervision and development; and organization of staff and services. The Associate Chair provides collection services in specific subject areas.

Marston Science Library

George A. Smathers Libraries, University of Florida

November 2007 – Present

Title: Science & Technology Librarian

Scope of duties:

- Provide reference assistance, instruction, outreach, and collection management for disciplines served by the Marston Science Library, specifically those in the College of Engineering's Departments of Agricultural & Biological Engineering and Biomedical Engineering.
- Use new technology to access and deliver information to library users located both locally and at a distance.

Health Science Center Libraries

University of Florida

May 2004 – November 2007

Title: Team Leader, Reference, Education, Information Management (REIM) Department

Scope of duties:

- Coordinated the day-to-day operations of the Department. Liaised between 5 FTE faculty librarians and the library's director. Supervised 1 FTE paraprofessional.
- Served as the REIM department representative on the Health Science Center Libraries' Division Heads committee and various other committees as needed.

Health Science Center Libraries

University of Florida

September 2001 – November 2007

Title: Reference Librarian

Scope of duties:

- Staffed the reference desk, participated in library instruction, participated in Ask A Librarian (the UF Libraries' chat reference service), performed mediated searches, selected resources for the Libraries' collection, etc.

- Served as library liaison to the College of Dentistry, as well as the College of Medicine's Department of Surgery, Department of Neurosurgery, Division of Nephrology, Hypertension and Renal Transplantation and Junior Honors Students. Liaison duties consisted of: serving as a contact person for faculty, staff and students of the College/Department, offering the various reference services to those patrons (library instruction, mediated searching, etc.), providing collection management in those disciplines, and serving on the Curriculum Committee for the College of Dentistry.

Education:

MS in Library Science
 University of North Carolina - Chapel Hill Date: May 2001

BA in Anthropology with High Honors
 University of Florida Date: May 1999

Honors:

- Academy of Health Information Professionals (AHIP)
 Provisional Member (1 June 2003 – 31 May 2005)
 Senior Member (1 October 2006 – 30 September 2011)
The Academy of Health Information Professionals is the Medical Library Association's peer-reviewed professional development and career recognition program. The academy recognizes the personal investment of time and effort required for exemplary professional performance and for contributions to the association and to the profession.
- First Place - 2004 National Medical Librarians Month Creative Promotions Award
Awarded to the Health Science Center Libraries by the Medical Library Association for our RxEAD poster campaign. Please see "Seize the Power of Your Patrons to Promote Your Library" under the Publications section for more detail on this project.

The Elegance of Science Art Contest (2009-2011 & 2014)
<http://www.uflib.ufl.edu/msl/art/>

I am one of the creators and the head coordinator of this scientific art contest. The goal of this contest is to increase the libraries' overall mission to serve as places for contemplation and discovery. In addition, the exhibit serves as an outreach resource for the University Alumni Association and the libraries to showcase the spectacular research going on at the University and the vibrant atmosphere of the University of Florida Libraries. In fall 2014 this contest will become a partnership between the George A. Smathers Libraries and the Florida Museum of Natural History.

Health Science Center Libraries' PubMed Tutorial. (2002-2005)
<http://www.library.health.ufl.edu/PubMed/PubMed2/credits.html>

The PubMed tutorial was the winner of a 2000 Davis Productivity Award and was linked to and cited by many different organizations around the world. In addition, it was profiled in an article from the Summer 2002 issue of Medical Reference Services Quarterly entitled "A Quiver Full of Arrows: Recommended Web-Based Tutorials for PubMed, PowerPoint, Ovid MEDLINE and FrontPage". In addition to being an author, I was also the webmaster and workgroup chair from 2004-2006.

Grants:

Title: *VIVO: Enabling National Networking of Scientists*

Funding Agency: *National Institutes of Health*

Status: Awarded

Funding Amount: \$12.3 million

Role: Key Personnel, Member of the Implementation and Outreach teams

VIVO is a multi-institutional database that facilitates communication and collaboration across interdisciplinary and institutional boundaries not only for scientists, but also for students, administrators, prospective faculty and students, donors, funding agencies, and the public. Built upon Cornell University's open-source VIVO platform, this national portal (www.vivoweb.org) will interface with local implementations of VIVO with information which is primarily ingested automatically from institutional data resources. Using semantic web technology, VIVO contains researcher profiles, grants, publications, courses, and research facilities. Under the current model, support for VIVO and data curation and management is coordinated by librarians and subject specialists at each research institution. Currently Cornell University and the University of Florida have implemented VIVO and at least five other institutions will join the network during 2010. In 2011, a new release of VIVO will include national networking features, citation metrics, and the inclusion of MeSH terminology. This collaboration is funded by the National Institutes of Health, U24 RR029822.

Title: *Gaming Against Plagiarism (GAP)*
Funding Agency: *National Science Foundation*
Status: Awarded
Funding Amount: \$298,660
Role: Co-Principal Investigator

This online, self-directed, interactive game will provide a role adopting environment in which Science, Technology, Engineering, and Mathematics (STEM) graduate students will learn to recognize and avoid plagiarism. GAP will employ strategies to affect behaviors that influence students' ethical behavior, including peer behavior, institutional norms, and differing cultural practices. It will be collaboratively designed, tested, and evaluated through a multi-disciplinary iterative development process by recognized experts in graduate science education, gaming, academic integrity, intellectual property rights, and educational digital media production. Six NSF Engineering Education awardees: Purdue University, Virginia Commonwealth University, University of Houston, Loyola Marymount, Oakland University, and Rowan University, along with the College of Sciences, University of Central Florida will assist in the testing and iterative refinement of the GAP intervention. The GAP project will be openly and freely available to these institutions and others to create the broadest possible national impact.
